QI FENG

United Kingdom | felixpetefeng@gmail.com

UCL MSc Urban Spatial Science student combining GIS analysis, Blender 3D modelling and digital fabrication, with experience delivering spatial evidence, web tools and visualisations for urban planning and public services.

EDUCATION

University College London (UCL), UK 2026 - Sep 2027 (expected)

MSc Urban Spatial Science | Currently studying

Programme curriculum: Python and R for urban analytics; quantitative methods, spatial analysis, data visualisation and reproducible research.

Nanjing University of Information Science and Technology Sep 2022 - Jul 2026

Undergraduate studies in Geographic Information Science

University of Reading, UK | Exchange coursework in Geographic Information Science

SELECTED GEOSPATIAL PROJECTS

Nanjing 3D terrain and urban modelling Dissertation, May 2026

- Integrated DEM, OpenStreetMap and imagery in QGIS/ArcGIS Pro; aligned projections and built terrain and simplified building models in Blender.
- Produced digital visualisations and 3D-printed models; repaired meshes and exported STL files, evaluating detail, computational cost and printability.

Hegang regional spatial planning research

- Applied DBSCAN clustering to analyse spatial density patterns; produced thematic maps and wrote a report chapter to support research on regional coordination.

Lushan physical geography fieldwork Jul - Aug 2024

- Led fieldwork and organised 100+ soil and hydrological data records; analysed and mapped findings in ArcGIS and led the fieldwork report.

RELEVANT EXPERIENCE

Nanjing Big Data Group Jul - Sep 2025

GIS Data Processing Intern

- Scraped, cleaned and coordinate-matched free healthcare service data; created ArcGIS Pro maps and independently built a public location-search and navigation website.
- Supported system testing and maintenance, documenting issues for investigation and fixes.

Turenscape, Beijing Aug - Sep 2024

GIS Analysis Intern

- Analysed land use in QGIS for Yueyang's green-space plan; produced ecological sensitivity maps and project visualisations, and helped prepare presentation materials.

Zhongshui Northeast Survey, Design and Research Jan - Feb 2024

Engineering Assistant Intern

- Interpreted satellite imagery and processed terrain data for 1:5,000 mapping; produced ArcGIS hydrological maps to support water engineering work.

TECHNICAL SKILLS

Python and R: Foundational proficiency; completing basic exercises through ongoing UCL study.

GIS and modelling: ArcGIS Pro/10.8, QGIS, Blender; DBSCAN; DEM processing; mesh repair; 3D printing and 3D printer repair.

Development and delivery: C# (basic GIS applications), C, web tool development, Excel; technical report writing and project visualisation.
